## 5 PROCEDURES TO FEEL GOOD THIS HOLIDAY SEASON

The holiday season of festive parties and plenty of time with loved ones is finally upon us! While it is a great time to enjoy the season, we can all feel stressed. There are people we have not seen all year, work parties to attend, and family reunions all take a toll. If you are already overwhelmed by the planning, don't add on worrying about your appearance! You should feel great at this time of celebration.

Our team at Isabella Medical Beauty Luxury Spa, knows that the holiday season can stress everyone out about what to wear, how they look, and everything in between. With our helpful procedures, you can go into this time confident and happy from the very beginning of the holiday season.

## **Feel Great This Holiday Season**

---

## **Cosmetic & Dysport Fillers**

The holiday season has many parties for you to attend. All of these make you want to look and feel your best. With cosmetic fillers & Dysport Injections, you can decide what area you want to enhance! There is the ability to plump thin lips, enhance shallow contours, and improve the appearance by diminishing wrinkles and fine lines. Your treatment plan is personal, and we can help you decide what changes will make you feel your absolute best.

## **Isabella's Signature Facial**

The cold weather would normally make your skin start to dry and crack, however during this warm weather year round. Taking your facial treatment serious is just as important. While keeping up a consistent skin routine can help avoid build up bacteria in your pores, sometimes introducing a Isabella's Signature facial can be the final necessary step to get glowing and smooth skin.

## **Cryofrequency Therapy**

Cryofrequency is a therapy that is controlled by cold, allowing entry at about  $-25^{\circ}\text{C}$  from the machine into the dermis in the skin. On the other hand, radiofrequency waves increase the internal temperature, causing an internal skin collision which is the result of combining external cold cryotherapy and internal hot radiofrequency. In the aesthetics world, we know this to be a 'thermal shock' that gives instantaneous skin tightening results to the targeted area(s).

---

## **Lipo for the Double Chin**

Two is normally better than one... but not when it comes to our chins. Excess fat and skin under the chin, often called the "double chin," can lower your confidence and make you feel less pleased with your self-image. Luckily, plastic surgery can help. Liposuction is a common plastic surgery procedure that seeks to remove excess fat and tighten the skin in certain areas of the body. And your chin is an area that liposuction can treat. If your double chin is causing you trouble, liposuction might be right for you.

## **Laser Hair Removal**

Unwanted hair is annoying year-round. By starting our laser hair removal procedures, you can start feeling fresh and be ready to go by the time the Christmas gatherings start. Our equipment is designed to work on different skin and hair types to make it possible for everyone to benefit.
